

**OUTSIDE** is the 2.0 version of a young 90's progrock band, turbulent child of Genesis, Pink floyd and Yes. Their two first albums had awakened the attention of prog fans. After these early days of brilliant press reviews and famous stages , the project lost its kinetic energy in realities of ordinary adult lives. But facing the lack of partners, lead guitarist Philippe RAU and drummer Olivier SAPTE kept on blowing in the fire all along 2000's, recording a classic rock album "The Limit" (musea parallèle - 2011). The rebirth came true between 2010 and 2013, looking for experienced mates in wider musical styles. Outside suddenly became **OutSide**, influenced by sounds of a metal bass (Matthieu HEISE) and vintage keyboards (Olivier SCHAAL). New singer Laurent HANTZ brought his social songwriting and garage sharpened guitar. The band was coming back to the basics of progrock in a quite unusual manner, mixing modern sounds and different roots. The result on stage is ambitious and generous. The upcoming album NAKED signs in february 2016 a new rising for The enfant Terrible of Prog Rock !
